

FUND OBJECTIVE & STRATEGY

The Future Titans Prescient Fund has a flexible mandate to invest in a range of asset classes but will typically have high exposure to companies outside of the Top 40 Index. The fund is permitted to invest 25% offshore plus an additional 5% in Africa. The primary objective of the fund is to achieve real long-term capital growth ahead of CPI + 6%. The fund looks to acquire fast growing, mispriced, mid-and small-cap shares, "Future Titans", on the back of high conviction fundamental investment calls. The fund has a deep value / activist bias.

FUND INFORMATION

Portfolio Managers:	Brendon Hubbard
Inception Date:	01 September 2009
Fund Size:	223.3
Unit Price:	239.96
ASISA Category:	South African - Multi Asset - Flexible
Benchmark:	CPI Upper Limit
Min lump Sum:	20 000
Min monthly investment:	1 000
Issue Date:	10 July 2018

WHO SHOULD INVEST

The fund is a high risk, high return fund and should be invested in as a complementary investment to any long-term blue-chip portfolio.

RISK INDICATOR

These funds typically exhibit more volatility given their higher exposure to equities and offshore markets where currency fluctuations may result in capital losses. Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

CUMULATIVE PERFORMANCE SINCE INCEPTION

NET PERFORMANCE

Period	Fund	Benchmark	Peer Group
1 month	-1.6%	0.5%	1.6%
6 months	-2.5%	3.0%	-0.9%

Highest rolling 1-year return*	35.0%	6.0%	21.3%
Lowest rolling 1-year return*	-12.8%	6.0%	-1.1%

*Since inception

MONTHLY COMMENTARY

The Future Titans Fund ended the month of June down 1.6% and the benchmark Flexible Index up 1.6%. This compares to a return of 2.8%, 0.6% and -1.2% for JSE equities, cash and bonds respectively.

The month of June proved to be a torrid month for the fund which was negatively impacted by the weakening Rand due to the SA-centric focus of the fund holdings. The Rand weakened 7.8% against the US Dollar and 6.8% against the Euro. This was largely driven by ongoing trade wars between the US and other countries, rating agency concerns around political risk in SA and the ever-widening current account deficit.

Metair was one of the laggards in the portfolio for the month on the back of the proposed acquisition of Slovenian automotive battery manufacturer, TAB. Metair management signalled at the December site visit the expectation of higher volumes and higher margins. On the back of this commentary we saw the price move as high as R25. The TAB acquisition requires a shareholder vote which is unlikely to succeed based on the share price movement which saw a low of R15.20 during the month. Metair is incredibly cheap with 99% upside to achieve the 10 year average PE multiple.

FEE STRUCTURE

TER	Class A1	Class A3
Annual Management Fee (excl. VAT)	1.30%	0.90%
Other Cost	0.10%	0.10%

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
